

AYUSH YADAV

Delhi, India | 9810679438 | ayushwell100@gmail.com
github.com/yadavayush834 | leetcode.com/u/ayushwell100

PROFESSIONAL SUMMARY

Backend developer skilled in building scalable and secure applications using Node.js and modern frameworks. Experienced in developing real-time systems (WebSockets), cryptographic authentication workflows, and AI-powered applications through end-to-end projects. Proficient in REST API design, database management, and integrating machine learning models into practical systems.

WORK EXPERIENCE

Backend Development Intern — IndiaHandmade.com Project

Digital India Corporation, Ministry of Textiles | June 2026 – Present

- Documented the complete customer journey and mapped IndiaHandmade.com workflows to Magento 2 REST APIs.
- Built an AI-powered Magento 2 recommendation module using OpenSearch k-NN for semantic search
- Implemented product-page and personalized homepage recommendations using Ollama embeddings with a production-ready AWS Bedrock-compatible architecture.

Tech Stack: PHP, Magento 2, MySQL, OpenSearch, Ollama, REST APIs

Open Source Contributor – GirlScript Summer of Code (GSSoC) | Remote | 2026

- Contributed to open-source projects including **CommitPulse** and **Hybrid Recommender** through GitHub pull requests.
- Added UI and utility tests, fixed bugs, reported security vulnerabilities, and improved code quality across React and Python-based projects.

Tech Stack: Git, GitHub, React, TypeScript, Python, FastAPI, Jest/Vitest

KEY PROJECTS

Game-Bot (AI Game Playing Agent) [GitHub](#)

- Developed an imitation learning AI using PyTorch that learns to play games from user demonstrations
- Implemented real-time screen capture, multi-label action prediction, and Dagger-based iterative improvement
- Optimized training using MobileNetV2, frame stacking, and advanced optimization techniques
- Tech Stack:** Python, PyTorch, OpenCV, MSS, Pynput, NumPy, Pillow

ISL Interpreter (Sign Language AI Web App) [GitHub](#)

- Developed a real-time ISL-to-text and speech translator using TensorFlow.js and MediaPipe
- Built full-stack system with authentication, gesture recognition, and translation history
- Deployed a browser-based solution accessible across devices without installation
- Tech Stack:** React, TensorFlow.js, MediaPipe, Firebase, MongoDB

SecureChat (Privacy Focused Chat) [GitHub](#)

- Developed a secure real-time chat app using Socket.IO with typing indicators and read receipts
- Implemented client-side cryptographic authentication using ethers.js (BIP39, ECC, digital signatures)
- Designed zero-trust backend with signature verification and replay attack protection
- Tech Stack:** React, Node.js, Socket.IO, MongoDB, ethers.js

EDUCATION

Dronacharya College of Engineering, Gurugram, India

2024-2028

Bachelor of Technology (B.Tech), Computer Science & Engineering

Semester 1 CGPA: 8.30 | Semester 2 CGPA: 8.80 | Semester 3 CGPA: 8.79 | Overall CGPA: 8.64

Kendriya Vidhyalaya, Delhi, India

2012-2024

Class 10 – 90%, Class 12 – 84%

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, Python, C++
- Frameworks:** Node.js, Express.js, FastApi, React, Mediapipe, Tensorflow.js
- AI / ML:** PyTorch, TensorFlow.js, OpenCV, MediaPipe, Ollama, OpenSearch (k-NN / vector search), AWS Bedrock
- Databases:** PostgreSQL, MongoDB, MySQL, Supabase, Firebase
- Tools & Platforms:** Git, Postman, Vercel, Socket.IO

ACHIEVEMENTS

- Completed **NPTEL Certification** in Data Structures & Algorithms – Scored 68%
- Completed **Infosys Springboard Certification** in C++ – Scored 100%
- Solved over 200+ questions on LeetCode and CodeChef, practicing data structures and algorithms
